Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 3 and 5 of U.S. Patent No. 5,926,465 and claims 1, 2, 3 and 5 of US Patent No. 5,610,906. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between claim 1 of the current Application and claims 1, 2, 3 and 5 of U.S. Patent No. 5,926,465 and 1, 2, 3 and 5 of US Patent No. 5,610,906 is that the limitation, "a product device for mixing the combined signal with a chipping sequence, and the antenna for transmitting the mixed

combined signal at a second frequency" of claim 1 of the present application is encompassed by the combination of the limitations "plurality of chipping sequences", "mixer for de-spreading base spread spectrum", and "product device for de-spreading spread spectrum", which are associated with claims 1, 2, 3 and 5 of U.S. Patent No. 5,926,465 and 1, 2, 3 and 5 of US Patent No. 5,610,906. It has been held that the omission an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA). Also note *Ex parte Rainu*, 168 USPQ 375 (Bd.App.1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art. Claims 2-17 depend on claim 1, so claims 2-17 are rejected as well.
